Android engineer

■ PROFESSIONAL EXPERIENCE

■ Newzulu

Android developer - *Since August 2015*

- Creation of an Android live streaming system (audio/video capture and streaming to an RTMP server)
- Development of the Newzulu Platform Android SDK (upload and fetching of image and video contents)
- Development of the Android Reporter Kit app

■ Batch.com

Lead mobile developer - *January 2011 > July 2015*

- Planning and tasks management of the mobile team.
- Android SDK development (5000 developers subscribed, 50 millions MAU).
- Head of technical support.

■ AppGratis

Web & mobile developer - *June 2011 > July 2015*

- Android and iOS app development (more than 25 millions downloads).
- Development of backend services (PHP, Java, MySQL, MongoDB).

■ SKILLS

- Good knowledge and practice of Java, Kotlin, Swift, Objective-C and Go.
- Mobile app development for both Android. I'm familiar with network, localization, hybrid apps, push and UI/UX best practices.
- Use of Android libraries: Rx, OkHttp, Picasso, Dagger, Mockito, ExoPlayer...
- Knowledge of SQLite, MySQL and MongoDB databases.
- Project management: small team management and tasks planning.
- Languages: French (Native) and English.

■ EDUCATION

- 2009 - 2011 : Master's degree at PSM (Produit et Services Multimédia) department.
- 2008 - 2009 : Bachelor's degree at PSM department.
- 2006 - 2008 : Two year degree at an institute of technology.

■ INTERESTS

In my free time I develop mobile and web projects, some of which are available on my github: github.com/benoitletondor. I've also participated to a few hackathons (fHacktory, LudumDare) and published a budget management app on the PlayStore: EasyBudget.
